

VAS SNAP

AN EFFECTIVE
TOOL FOR
ENFORCING
SPEED LIMITS AND
MAINTAINING
A SAFE
ENVIRONMENT

Introducing the Messagemaker Displays VAS Snap, allowing you to automatically record any speeding vehicles on site.

This system will help enforce the speed limit by providing high-quality video footage of the vehicle triggering the device. Not only will it highlight regular offenders on site; it will also give further incentive for drivers to reduce their speed.

Easily retrievable content through a micro SD card, this camera provides you with all the evidence you need with time-stamped video clips.

Alongside all the benefits of using this system, it is also made to be user friendly.

Suitable for use on mobile and fixed applications.

Accompanied with Messagemaker Displays' VAS devices, the camera is an effective tool in calming speeds, but also highlighting offenders.

KEY POINTS

- 4K high resolution imagery
- Records a short video clip of the speeding vehicle to ensure the offense is captured
- Compatible with Messagemaker Displays' data capture software, pinpointing the exact date, time and speed
- 8 megapixel camera
- 4K footage at 15fps
- In-built infrared
- 60 metre range
- Digital watermarking
- Intelligent detection
- Network connection to receive notifications and review footage or live stream
- Abnormality detection and warning system such as SD card error and network disconnection
- IP67 weatherproof
- On-board micro SD card 128GB to store up to 5 hours of video clips for use in remote environments

**Camera is for private use only. Not to be used on public highways.*
