Messagemaker Displays

Remote Connect System - RCS

UPDATE AND MONITOR ALL SIGNS REMOTELY AND EFFICIENTLY

KEY POINTS

- Quickly update messages
- Remotely activate and deactivate device
- Monitor battery levels
- Schedule messages and save designs
- Compatible with VMS using a 4G modem

Introducing the innovative Remote Connect System from Messagemaker Displays, an essential tool for monitoring and content updates.

With this system the user can remotely activate/deactivate the device alongside having the ability to check the battery life and which message is being displayed. The user will also have the ability of scheduling messages and saving messages for future use.
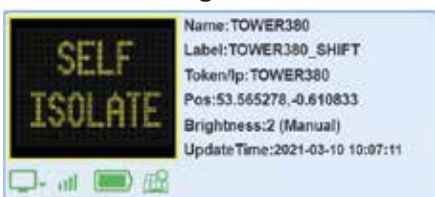

With the utilisation of the GPS and location mapping feature, the system also aids in theft protection as any unauthorised movement raises an alarm to the user.

This system comes with a written user guide, alongside technical support from our engineers. This system has a wide range of possibilities; whilst also being user friendly.
