

VAS Data Download

EFFECTIVELY RECORD
THE SPEED OF VEHICLES
24 HOURS A DAY

Introducing the Messagemaker VAS Data Download system, allowing you to download all the data stored within your VAS devices, with ease.

Using this data provides a variety of benefits such as highlighting speeding patterns and justifying funding both from the past and in the future.

A micro USB cable can be plugged directly into your speed sign in order to extract the data onto your laptop. The device must be unlocked and opened in order to access this port. We also offer an alternative option using Bluetooth. With this the user can park within 10 metres of the device and extract the data wirelessly.

Alongside all the benefits of using this system, it is also made to be user friendly. We have a team of engineers happy to help and answer any questions that may come up.

KEY POINTS

- Quickly download data from all of your VAS devices
- Providing accurate, around the clock data
- Showing the time and the speed of each recording
- Helps to show speeding patterns
- Multiple variants available upon request:
 - Micro USB
 - Bluetooth
 - Modem
