

CLOCKS AND TIMERS

VERSATILE DEVICES
WITH MULTIPLE
USES, OFFERING A
MODERN LOOK TO
YOUR WORKING
ENVIRONMENT.

Popular in the finance, office, industrial and public sectors, these LED signs are versatile devices with multiple uses such as the ability to display the current time, date and temperature whilst also holding the capabilities to counting up and down.

This sign holds a greater viewing distance than common clocks and timers, whilst also being visible in the dark. Using the digital view makes it easier to get a more accurate reading of the time.

Displaying the temperature in any given area helps with heating and cooling efficiency in order to save energy. This is down to the fact it helps remind people of the actual temperature in the room which will, in turn, prevent over and under heating.

KEY POINTS

- ▶ 5 pre-programming options; clock, date, temperature, stopwatch and count-down/up
- ▶ Super bright 7-segment LED modules
- ▶ 15 manual brightness settings
- ▶ Clear visibility in bright sunlight conditions
- ▶ Outdoor model available to withstand harsh industrial conditions
- ▶ Double casing protection and internal steel frame and external aluminium frame
- ▶ Optional temperature recording feature
- ▶ Free standing or wall mounted
- ▶ Multiple sizes available
- ▶ Remote control operated
